Summary

AI/ML Engineer skilled in building machine learning models, deep learning pipelines, and full-stack data-driven solutions. Experienced in computer vision, NLP, and predictive modeling, with strong expertise in Python, TensorFlow, PyTorch, and modern ML tools. Focused on solving real-world problems through efficient model development, research-driven experimentation, and scalable engineering practices.

Technical Skills

Programming: Python, HTML, CSS, SQL

Frameworks: TensorFlow, PyTorch

Libraries/Tools: NumPy, Pandas

Projects

AI App Builder — Multi-Agent AI Coding Assistant

2025

- Built an AI-powered coding assistant using LangGraph that generates complete working software projects from natural language instructions.
- Designed a structured multi-agent architecture:
- Developed installation workflows using `uv`, virtual environments, and environment variable configuration.
- Enabled automatic generation of apps such as to-do lists, calculators, and FastAPI-based blog APIs.
- Built full setup, dependency installation, and execution flow using `python main.py`.

Youtify — Hybrid Music Streaming Web App

Oct 2024 – Nov 2024

GitHub: sabarishloganathan/youtify-web

- Developed a hybrid multimedia streaming platform combining features of YouTube and Spotify.
- Built real-time audio/video playback, playlist creation, and personalized content recommendation features.
- Created a responsive UI and cross-platform solution using React / Flutter / Python.
- Built backend APIs to aggregate content and enable smooth multimedia streaming.
